APPENDIX

47 U.S.C. § 153. Definitions

* * * *

(29) Network element—The term “network element” means a facility or equipment used in the provision of a telecommunications service. Such term also includes features, functions, and capabilities that are provided by means of such facility or equipment, including subscriber numbers, databases, signaling systems, and information sufficient for billing and collection or used in the transmission, routing, or other provision of a telecommunications service.

* * * *

(43) Telecommunications—The term “telecommunications” means the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received.

* * * *

(46) Telecommunications service—The term “telecommunications service” means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.

47 U.S.C. § 271. Bell Operating Company Entry into InterLATA Services

* * * *

(e) Limitations—

(1) Joint marketing of local and long distance services—Until a Bell operating company is authorized pursuant to subsection (d) of this section to provide interLATA services in an in-region State, or until 36 months have passed since February 8, 1996, whichever is earlier, a telecommunications carrier that

A-2

serves greater than 5 percent of the Nation's presubscribed access lines may not jointly market in such State telephone exchange service obtained from such company pursuant to section 251(c)(4) of this title with interLATA services offered by that telecommunications carrier.
